PROUDLY CANADIAN

“Where Curb Appeal Meets Craftsmanship.”

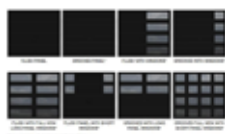

With over 30 years in the garage door industry and over a hundred thousand satisfied customers, we've built a reputation for craftsmanship, reliability, and unmatched attention to detail. The SIGNATURE series is the product of quality without compromise. With many designs, styles, colours and customization options, we aim to give your home the curb appeal it deserves.

“According to the Remodeling National Cost vs Value Report, replacing a garage door gives a consumer a 102.7% ROI (Return on investment)”

KEEP IT CANADIAN

Our commitment to the community runs deep. By manufacturing most of our garage doors in Canada, we reduce freight costs, shorten lead times, and ensure consistent product quality.

UNIQUE AND CUSTOMIZED DESIGN.

We offer a wide and ever-expanding selection of styles, colours, and glass options to help clients achieve their ideal curb appeal. Each door is custom-built from scratch in close collaboration with our clients.

THE ENERGY EFFICIENT CHOICE

As a Canadian company built for the Canadian market, we focus on crafting garage doors designed to withstand our harsh climate. With some of the highest insulation R-ratings available, our doors help keep the cold out and comfort in.

EXCELLENCE IN CONSTRUCTION

Garage doors only last when they're built to last. That's why our process uses durable 24-29 gauge steel, which undergoes a hot-dip galvanizing process. By immersing the metal in molten zinc, we create a protective zinc layer that guards against rust, moisture, and other environmental factors that can degrade metal over time.

UNCOMPROMISED HARDWARE

“3-inch, 14-gauge galvanized door hinges—not the weaker 2-inch, 18-gauge, for added strength and durability. Weather stripping is double-fin with a protective cover, not single strip nailed on, ensuring protection from the elements. High-quality torsion springs rated for 15,000 cycles (not just 10,000), with an electrophoretic coating to resist rust and extend lifespan. White nylon (neoprene) rollers instead of noisy steel or flimsy plastic ones.

WARRANTY SHIELD

A Warranty You Can Rely On
We proudly stand behind our work with a comprehensive warranty:
Lifetime warranty on the door finish
3-year warranty on hardware
1-year warranty on labor

UNDERSTANDING GARAGE DOORS:

Garage doors are manufactured from a variety of material. The material it's constructed from typically are steel, aluminum, particle wood, natural wood, composite wood fiberglass and vinyl. With these many options it's crucial to understand that each has its own pros and cons. whether it's lasting durability, maintenance requirement, weather resistance, insulation factors, design options and cost; a home owner is encouraged to speak to the garage door experts and follow market trend in your region. For our Canadian climate time and time again steel doors always tend to archive the biggest market share. It is why most manufacturer and dealer focus on steel door. Steel garage doors claim for over 70% of the market due to its durability with hardly any maintenance needed for the finish, highest insulation rating to withstand the cold, a much-expanded options of styles and colours, its great warranty and ultimately cost to homeowners. Steel garage doors however differ based on certain factors such steel gauge thickness, layer construction, thickness of door, insulation material used and insulation R-factors.
